Chemical Geology (Isotope Geoscience Section), 101 (1992) 323–324
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 101, 1992

Special Issue "Frontiers in Isotope Geosciences", by R.S. Harmon and R.W. Hinton (Guest-Editors)

Introduction, by R.S. Harmon and R.W. Hinton (Guest-Editors) vii

Part I — Published Proceedings of the NERC Isotope Geosciences Laboratory Conference on "Frontiers in Isotope Geosciences" held at the Kingsley Dunham Centre, Keyworth, on January 3 and 4, 1991

In situ laser microprobe techniques for stable isotope analysis
Z.D. Sharp (Lausanne, Switzerland) 3
In situ oxygen isotope analysis of feldspar and quartz by Nd:YAG laser microprobe
D. Elsenheimer and J.W. Valley (Madison, Wis., U.S.A.) 21
LASSIE (laser ablation sampler for stable isotope extraction) applied to carbonate minerals
P.C. Smalley, C.N. Maile, M.L. Coleman and J.E. Rouse (Sunbury-on-Thames, U.K.) 43
Laser microprobe stable isotope measurements on geological materials: Some experimental considerations (with special reference to $\delta^{34}S$ in sulphides)
A.E. Fallick, P. McConville, A.J. Boyce, R. Burgess and S.P. Kelley (Glasgow, U.K.) 53
Laser microprobe study of sulfur isotope variation in a sea-floor hydrothermal spire, Axial Seamount, Juan de Fuca Ridge, eastern Pacific
D.E. Crowe and J.W. Valley (Madison, Wis., U.S.A.) 63
Some instrumental effects in the determination of stable carbon isotope ratios by gas chromatography–isotope ratio mass spectrometry
P.A. Eakin, A.E. Fallick and J. Gerc (Glasgow, U.K.) 71
Application of high-sensitivity carbon isotope techniques — a question of blanks
P.D. Yates, I.P. Wright and C.T. Pillinger (Milton Keynes, U.K.) 81
Oxygen stable isotope measurements on a gravestone exposed to the Hiroshima A-bomb explosion and the "Dosimetry System 1986"
D. Blamart, W. Rühm, W. Spiegel (Garching, Germany), K. Kato (Hiroshima, Japan), G. Korschinek, H. Morinaga, G. Morteani and E. Nolte (Garching, Germany) 93
The abundance and isotopic composition of the noble gases in ancient fluids
F.M. Stuart and G. Turner (Manchester, U.K.) 97
Negative thermal ionisation mass spectrometry: a new approach to boron isotope geochemistry
U.S. Klötzli (Berne, Switzerland) 111
Experimental determination of fractionation of $^{11}B/^{10}B$ between tourmaline and aqueous vapor: A temperature- and pressure-dependent isotopic system
M.R. Palmer (Bristol, U.K.), D. London (Norman, Okla., U.S.A.), G.B. Morgan VI (St. Louis, Mo., U.S.A.) and H.A. Babb (Norman, Okla., U.S.A.) 123
Single-zircon dating by step-wise Pb evaporation: Comparison with other geochronological techniques applied to the Hercynian granites of Corsica, France
A. Cocherie, C. Guerrot and Ph. Rossi (Orléans, France) 131
Laser ^{40}Ar–^{39}Ar ages for individual detrital muscovites in the Southern Uplands of Scotland, U.K.
S.P. Kelley (Milton Keynes, U.K.) and B.J. Bluck (Glasgow, U.K.) 143
Thorium isotope ratio measurements at high abundance sensitivity using a VG *54-30*®, an energy-filtered thermal ionization mass spectrometer
Z.A. Palacz, P.A. Freedman and A.J. Walder (Middlewich, U.K.) 157

Part II — Short reports (with discussion) of the "Ion Microprobe Stable Isotope" Workshop held at the University of Manchester on January 5, 1991

Sulphur isotope analysis of pyrites
C.M. Graham (Edinburgh, U.K.) and J.W. Valley (Madison, Wis., U.S.A.) 169

0168-9622/92/$05.00 © 1992 Elsevier Science Publishers B.V. All rights reserved.

Oxygen isotope measurement of magnetites
J.W. Valley (Madison, Wis., U.S.A.) and C.M. Graham (Edinburgh, U.K.) 173
Carbon isotope measurements on diamonds
B. Harte (Edinburgh, U.K.) and M. Otter (Rondebosch, South Africa) 177
Oxygen isotope analysis using extreme energy filtering
R.L. Hervig (Tempe, Ariz., U.S.A.) 185
Instrumental limitations for isotope measurements with a Caméca® ims-*3f* ion microprobe: Example of H, B, S and Sr
E. Deloule, M. Chaussidon and P. Allé (Nancy, France) 187
Oxygen isotope analysis on the Caméca® ims-*300*
J.C. Lorin (Orsay, France) 193
The Isolab® *54* ion microprobe
I. Lyon and G. Turner (Manchester, U.K.) 197

Special Issue "Isotope Fractionations in Organic Matter: Biosynthetic and Diagenetic Processes", by S.A. Macko and M.H. Engel (Guest-Editors)

Introduction, by S.A. Macko and M.H. Engel (Guest-Editors) iii

Stable isotope fractionation of biomonomers during protokerogen formation
Y. Qian, M.H. Engel (Norman, Okla., U.S.A.) and S.A. Macko (Charlottesville, Va., U.S.A.) 201
Kinetic fractionation of stable carbon and nitrogen isotopes during peptide bond hydrolysis: Experimental evidence and geochemical implications
J.A. Silfer, M.H. Engel (Norman, Okla., U.S.A.) and S.A. Macko (Charlottesville, Va., U.S.A.) 211
Stable carbon isotope variations in sediment from Baffin Bay, Texas, U.S.A.: Evidence for cyclic changes in organic matter source
B. Anderson, R.S. Scalan, E.Wm. Behrens and P.L. Parker (Port Aransas, Texas, U.S.A.) 223
The stable isotopic composition of photosynthetic pigments and related biochemicals
M.C. Kennicutt II (College Station, Texas, U.S.A.), R.R. Bidigare (Honolulu, Hawaii, U.S.A.), S.A. Macko (Charlottesville, Va., U.S.A.) and W.L. Keeney-Kennicutt (College Station, Texas, U.S.A.) 235
Chemical changes and carbon isotope variations in a cross-section of a large Miocene gymnospermous log
A.L. Bates and E.C. Spiker (Reston, Va., U.S.A.) 247
Stable isotope (C, S, N) and molecular studies on the Precambrian Nonesuch Shale (Wisconsin–Michigan, U.S.A.): Evidence for differential preservation rates, depositional environment and hydrothermal influence
S.W. Imbus (Houston, Texas, U.S.A.), S.A. Macko (Charlottesville, Va., U.S.A.), R.D. Elmore and M.H. Engel (Norman, Okla., U.S.A.) 255
Changes in organic carbon stable isotope ratios across the K/T boundary: global or local control?
P.A. Meyers (Ann Arbor, Mich., U.S.A.) 283
Stable isotope partitioning in seep and vent organisms: chemical and ecological significance
M.C. Kennicutt II, R.A. Burke, Jr., I.R. MacDonald, J.M. Brooks, G.J. Denoux (College Station, Texas, U.S.A.) and S.A. Macko (Charlottesville, Va., U.S.A.) 293
Carbonate mineral distribution and isotope fractionation: An approach to depositional environment interpretation, Green River Formation, Wyoming, U.S.A.
G.M. Mason (New Albany, Ind., U.S.A.) and R.C. Surdam (Laramie, Wyo., U.S.A.) 311
